Pursuing sustainable long-term growth

SE Holdings and Incubations Co ,Ltd

SE H&I

SE Holdings and Incubations (SE H&I) Group is an enterprise which pursues sustainable long-term growth by contributing to the society through proactive participation in the growth of markets such as the information industry. Because our growth is both supported by the evolution of technologies and service and grounded in the progress of whole market and industries. We also incubate new businesses and promote their entries into markets, which we believe will ultimately result in revitalization of our target markets. "Improving our growth efficiency by developing a robust business foundation across target markets and by decreasing risks in each business" is our operation principle, and through these efforts, we have been working on forming an enterprise group consisting of a suitable combination of business entities. SE H&I Group focuses on its own growth and contribution to the society over the long term. With this focus in mind, the Group holds the basic value of "Working on truly right things" at the core of its business operation. The diverse contributions of the SE H&I Group include those to society through business activities that serve to the IT technologies & services industry, to the capital market by business performance improvement, and to the social infrastructure by tax payment and job creation. To become an enterprise which can realize this social value perpetually, we will keep high aspirations, work together as a team, and vigorously push forward to the future.

SEH&I Group

Integration of core competencies that create the future

SE Holdings and Incubations Group (SE H&I Group) was established in October 2006 by shifting all the business operation of Shoeisha Co., Ltd. including publishing, software networking, and corporate services businesses to a pure holding company structure. Currently, the Group undertakes the following businesses under a more efficient and highly impetus organization structure:

- IT technology information services
- Mobile internet services
- Marketing services for IT-related enterprises
- Store operations utilizing IT technology
- Development of IT engineers and human resources services

In these five strategic investment areas, the Group works on maximizing business value by business positioning, proactive incubation in the IT industry, and the forming of an enterprise group.

We amass high-quality contents toward a new publishing business

The publishing business is undergoing a diverse evolution. With the provision of high quality content as one of its core competencies, and with leading edge technology at its core, Shoeisha Co., Ltd. is developing its businesses in education, personal computing and design, and business and culture. In addition to paper media such as books and magazines, Shoeisha also provides customized optimal content for a variety of media including e-books, e-learning, online magazines, software, events, seminars, distance learning and much more.

■Technology

In addition to content that supports the core technologies of an information based society such as mobility, the cloud, networks, security, databases, programming and other technologies, Shoeisha provides the latest content required for managing development projects, including interpersonal and communications skills.

■Education

Shoeisha provides a wide range of test preparation information from the core areas of application operation levels sponsored by IT vendors and public institutions, to technological certifications requiring advanced development and operational skills, as well as financial, legal and even general certifications. Together with this, Shoeisha provides various content to help improve business skills and advance individual careers.

■Personal computing & design

With a foundation of content designed to provide users with a more fulfilling digital lifestyle, Shoeisha also provides the latest content that allows users to fully utilize the ever-expanding range of social networking services, smartphones, tablets and more. In addition, Shoeisha also makes available optimal content for all users, from beginner to professionals, on web design, DTP, computer graphics, and more.

■Business & culture

Centered on management, marketing and finance, Shoeisha provides everything from the latest know-how that supports the skills required for daily business life and advancing individual careers to "truly useful" content that meets the needs of modern business, which continues to become more borderless and globalized at an increasing rate of speed.

■SEshop.com

SEshop.com is an online "boutique" for everyone involved in computing, including programmers, engineers and even business users. In addition to Shoeisha publications, the shop boasts a wide selection of products including tickets to various seminars, and most notably, a selection of 1,500 software products for developers.

Technology Information

SE Academy

SHOEISHA Academy Co.,Ltd.

<http://www.shoeishaacademy.co.jp>

Educational business for electrical engineers

We manage correspondence courses to pass the examination of the electricity chief engineer which is a big value National qualification because of the low pass rate, and which has high needs from companies even at the time of recession. Also, we have correspondence courses of the qualification of electrical engineering technicians who are engaged in electrical constructions of some facilities and conventional homes. The high quality lectures by experienced teachers and the effective supports by our professional staffs provide the original contents to pass their examination.

A pioneer in the networking era

SE Mobile and Online Co., Ltd., as a pioneer in the networking era, works on meeting customer demand and developing the IT market by pursuing state-of-the-art technologies and services. Corresponding to a wide variety of new technologies, our diverse operation includes a mobile contents business utilizing rich technology information, social and other games development/operation business, and enterprise system development business.

Mobile business

Taking advantage of deep experience accumulated from the beginning of the mobile contents market, we work on development/operation business of paid/free contents & apps as well as sub-contracting of contents development/operation for the rapidly growing smartphone market.

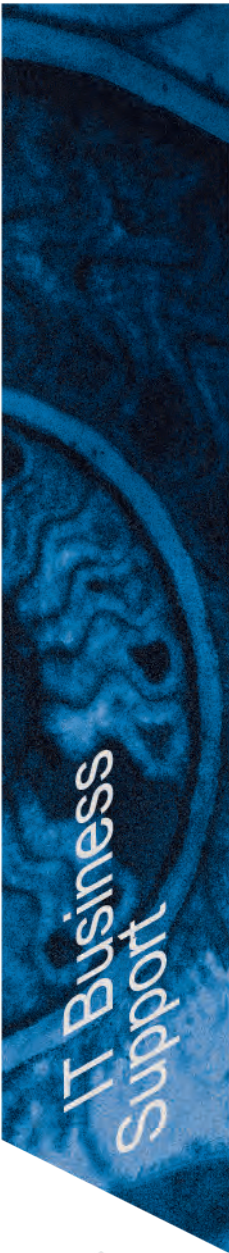

Gaming business

We are engaged in game development of a wide variety of game genres and diversified interfaces, based on rich development experiences and technical capacities. Particularly in the social gaming field, we offer development/operation services and joint development/operation for many gaming enterprises.

System development business

With flexible technical capabilities that can be utilized on diverse technologies and devices, we offer system development services to meet customer needs.

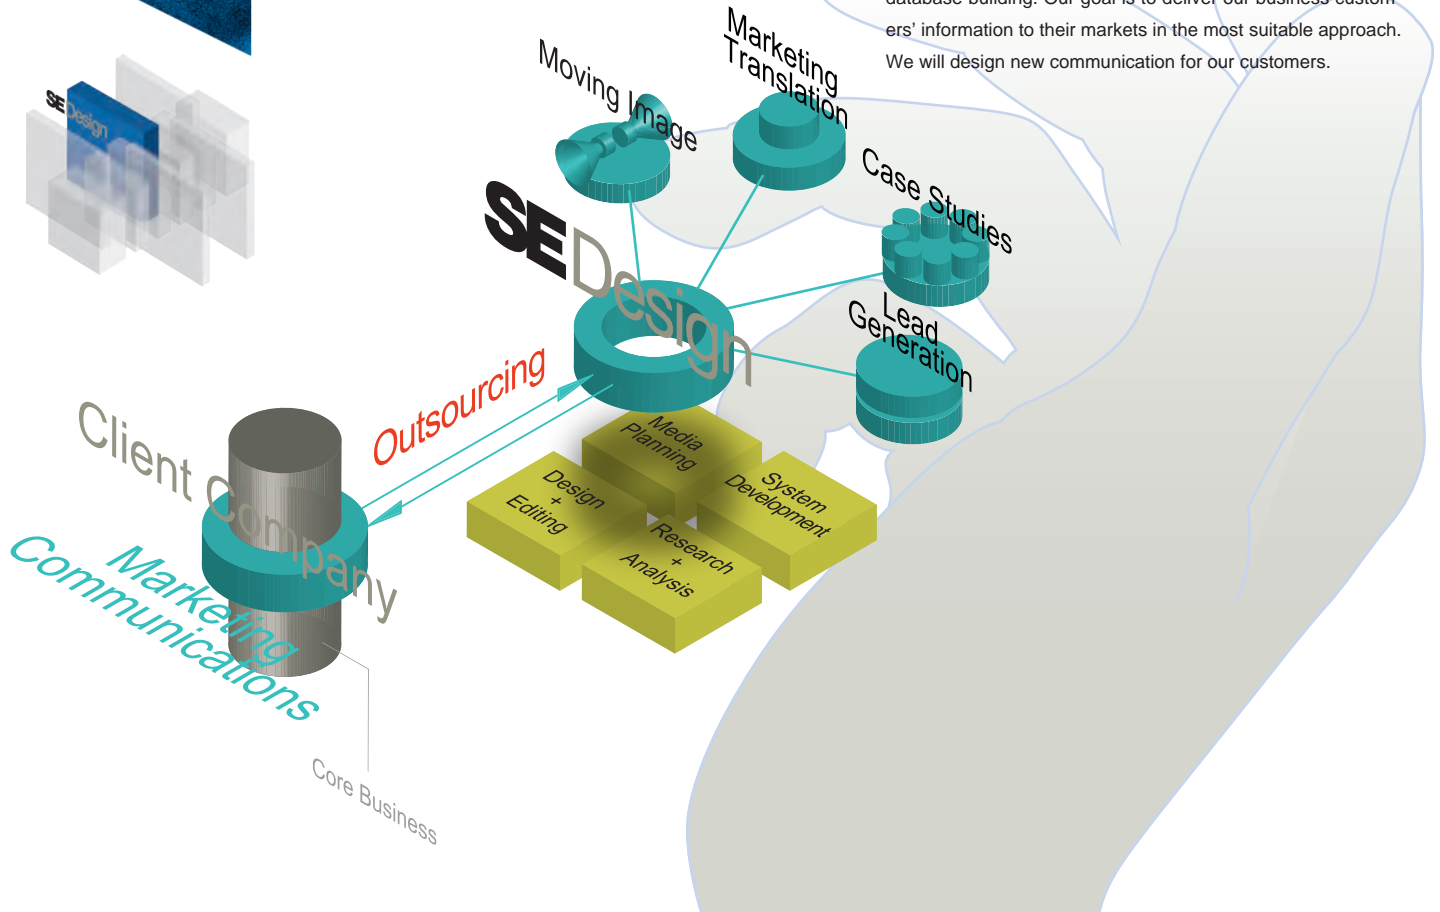

Communication design creates enterprise value

With the rise of cloud computing and the growth of information devices such as smartphones and tablet PCs, the online media world has become richer and deeper in recent years. This means that businesses now need to shift their marketing strategies to one that can improve the cost efficiency of product information management and branding and accomplish higher performance. In the ever-changing media environment, SE Design Co., Ltd. always pursues the best communication approach for enterprises, and designs suitable communication for each business and their products/services.

Support for businesses' marketing communication

Businesses need a robust identity and flexible media strategy to promote themselves and their brands through complex and diverse media channels. In addition, they require a suitable brand design for effective campaigns, precise target analytics, an integrated information delivery plan for printed media and online media, organization of events and seminars, a campaign plan to attract more customers, an appropriate lead generation approach, and consistent digital asset management for all these marketing efforts. SE Design can offer integrated communication design for businesses from contents editing to database building. Our goal is to deliver our business customers' information to their markets in the most suitable approach. We will design new communication for our customers.

Game Goose
